

## IMPORTANT INFORMATION ABOUT YOUR INTRUDER ALARM SYSTEM

As you're aware having a monitored security system installed in your premises is an essential way to protect yourselves and your business, but are you protected against the devastation that fire can cause?

*"A total of 23,000 buildings(businesses) in England experienced at least one fire during the previous 12-months. Around 52% were left out of pocket after insurance excess payments, not to mention the loss of irreplaceable customer data/trade; having smoke detectors linked into their monitored alarm system could have helped to prevented this."*

Fires can be handled with minimum damage to your property if they are caught early.

### We have the solution!

The system we are offering is a simple add on for your existing monitored alarm and because the detectors are wireless they can be installed in any room quickly and efficiently without the need for any messy wiring.

### How it works:

The Risco wireless smoke detector system package includes 2 wireless smoke detectors and 1 wireless receiver. The receiver is located next to and linked into your existing monitored alarm control panel.

In case of a fire it will message pre specified contacts automatically so action can be taken immediately to prevent further damage/destruction to your home.

- All key holders will be alerted
- Fire brigade will be alerted for a quick response
- Because it is linked into your existing system, the external sounder will be activated making neighbours/passers by aware of the situation

In conjunction with national fire prevention week (Oct 4<sup>th</sup>-10<sup>th</sup> 2009) we are offering a package consisting of a wireless detector and 2 wireless smoke alarms for only **£299.00 +VAT** .

If you require any additional wireless detectors we can provide them for only **£99.00 +VAT each**

# CONTACT SECURITY

- INTRUDER ALARMS
- CCTV
- ACCESS CONTROL
- INTERCOMS
- GATE & BARRIER AUTOMATION

**If you already have a fire alarm fitted then we can link these to your existing alarm system for only £149.99 +VAT to receive all the benefits listed above.**
